

PARENT-TEACHERS MEETINGS

The Institute runs only one course ie Post Graduation in Aerospace Medicine which has 3 out of 10 seats for civil candidates. All students are above 21 years of age and have chosen specialty after in depth research. IAM is the only Institute imparting training in Aerospace Medicine. Being a Defence Services Establishment of repute for MBBS qualified MOs, the need has never arisen for any Parent - teacher meetings. However, the parents of students do interact with the faculty, esp dean from time to time and also invited for valedictory at the end of the course. No issues pertaining to training or otherwise have come to fore till date
